

List of (sub-) processors, recipients in third countries and international organisations

This document contains all the (sub-) processors we use, as well as recipients in third countries and international organisations to which we transfer personal data. It should (1) enable our business partners to identify the processors we use or have approved, recipients in third countries and international organisations, and (2) enable the data subjects to know their rights and to exercise them. For reasons of transparency, we draw your attention to the fact that the companies we specify generally process personal data via third parties (e.g. external hosting of websites or SaaS applications). You can find details about data processing by these companies on the relevant specified website.
